**Elementix**<sup>™</sup>  
rainscreen cladding

# Elementix™

Elementix is a unique rainscreen cladding system that provides specifiers with exciting new glazed finishes and a patented fixing system that allows easier installation.

## Features & Benefits

- Unique colour range of natural clay and real ceramic glazes
- Patented fixing system allows easy installation and replacement of tiles from any point in the façade
- Confidence of backing by UK's largest clay cladding manufacturer with its nationwide network of design advisors to provide expert support
- Colours available to match other glazed products from the Ibstock range
- High strength natural clay tiles ensure a robust cladding with long term durability and low maintenance
- 440mm x 215mm size for ideal co-ordination with standard brickwork and masonry
- Ceram Building Technology endorsed for use right down to ground floor of a building
- Third party tested to CWCT Standard

| Elementix® Technical Data:              |                            |
|---|----------------------------|
| Size                                    | 440mm x 215mm              |
| Tile Weight                             | 4.6Kg                      |
| Total System Weight                     | 86Kg/m <sup>2</sup>        |
| Durability                              | Frost Resistant            |
| Transverse Strength (Impact resistance) | 5.8kN Category E to BS8200 |
| Water Absorption                        | < 3%                       |

### Third Party Tests:

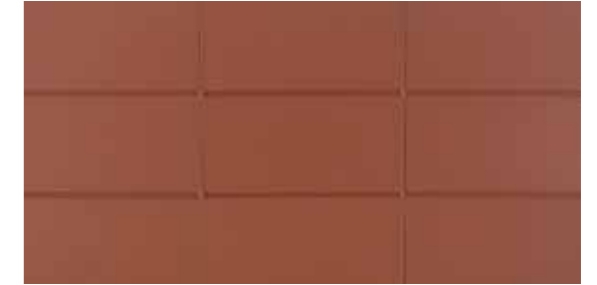

CERAM Building Technology.  
Report: SW212.03. Centre for Windows & Cladding Technology – CWCT Standard.
